### Lights, Lights, Lights!

In addition to two bright LED lights over the needle and bed of the machine, the **CoverPro 3000P** has the added bonus of a retractable LED light over the sewing area. This greater visibility feature means easy to see sewing at it's best!

### Smooth and Stable

Equipped with a main shaft that uses ball bearings, there is even less vibration for a reliable machine that will last for years. You'll have the power and torque you need to sew through heavier weight fabrics.

### Enhanced Tension Level Control

If you don't like playing with tension, then you'll LOVE this feature! The Tension Level Control (TLC) has been enhanced by the new Fine Mode Switching Mechanism. Switching from heavy to sheer knits and fabrics only takes the swish of a lever, changing the timing and the stroke range of the take up lever, which softens the needle thread tension. Say goodbye to puckering on sheer fabrics!

### Thread Chain Off

Finishing the end of your top stitch cover hem is easy and fast. As you sew off the end of the fabric, the machine will continue to chain stitch. Ending your hem seams is now quicker than ever!

### 3-Position Needle Threader

Whether you are using one, two, or all three needles, quickly drop the built-in needle threader into place to thread the needle and you are ready to begin sewing!

### Built-in Top Cover Stitch Guide

An industry first! The built-in stitch guide easily swings into place, providing you with a triple or double Top Cover Stitch, that will bring your finishes to the professional level.

# BEST FRIENDS: Cut from the same cloth

AIRTHREAD 2000D  
PROFESSIONAL

COVERPRO 3000 PROFESSIONAL

Built on a foundation of trust, confidence, pride, and everlasting love.

Beautiful bindings, pristine hems, and casings with elastic bands (all in one pass) are done quickly and efficiently with the CoverPro 3000P. That's why it's the perfect addition to your sewing room.

# SEW THE LOOK

*Wait!  
You  
Made  
That?*

Credit: Dress is  
Simplicity Pattern #9261

No one will believe that you made it, but that's OK because you know you did! Whether it's basic knitwear, lingerie, dancewear or swimsuits, the **CoverPro 3000P** will provide you with the results that take your sewing from homemade to runway worthy. So, go ahead, strut your stuff and show off your creations! Join our community at: #janome, #janomemakes, or tag us @janomeamerica

# ACCESSORIZE

Learn more about optional accessories that are designed to help you get the most out of cover stitch applications. Go to, [www.janome.com/products/accessories/](http://www.janome.com/products/accessories/) and then select the "CoverPro" from the Filter By Accessories menu.

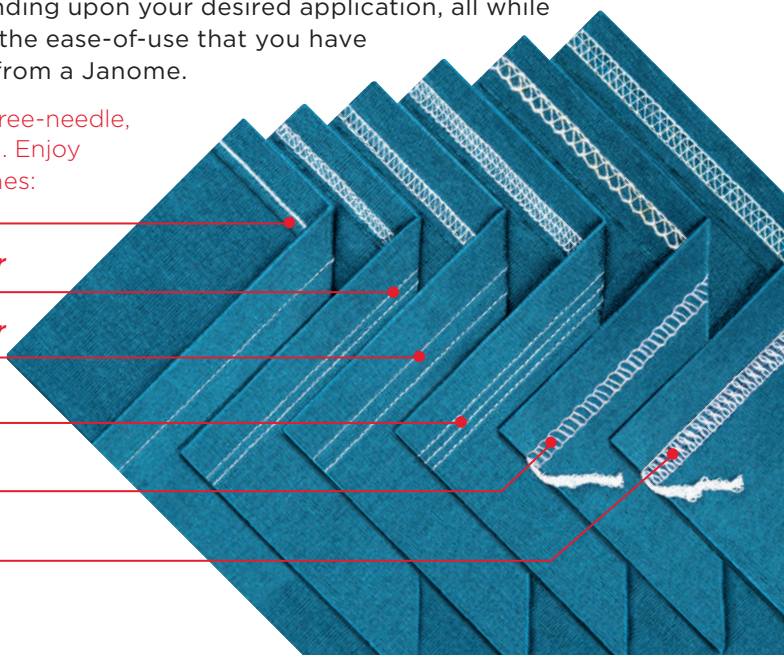

# What Will a Cover Stitch Machine Do?

Whether a passionate hobbyist or professional sewist, you're always looking for the next step in perfecting your craft. The **CoverPro 300P** is the natural progression of this and complements your sewing machine and serger. Enjoy professional results with your hemlines, utilizing double and triple needle cover stitches, as well as chain stitching that can be utilitarian or decorative depending upon your desired application, all while benefitting from the ease-of-use that you have come to expect from a Janome.

The 3000P is a three-needle, five-thread model. Enjoy these useful stitches:
